((review of the academic program)

Fundamentals of Biochemistry 1

وصف المقرر

This course description provides a summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, proving whether he has made the most of the available learning opportunities and must be linked to the program .description

1. Educational Institution	Al-Zahrawi University College - Ministry of Higher Education and Scientific Research
2. University Department / Center	Medical laboratory techniques
3. Course Name / Code	Clinical endocrinology 2
4. Programs in which it is included	Bachelor of Biochemistry
5. Available Forms of Attendance	Daily Attendance in the lab
6. Semester / Year	2024-2025 Second Semester
7. Total Number of Study Hours	8 hours per week
8. Date of preparing this description	2024-2025
9. Course Objectives:	Provide students with an understanding of the structure and function of a number of the body's main physiological systems and their role in maintaining the body's balance, as well as linking physiological processes to their fundamentals at the cellular level, estimating the normal values of vital activities in relation to different biological conditions, and clarifying the extent of these normal and abnormal values in pathological cases, practically and theoretically.

## **10. Learning Outcomes, Teaching and Learning Methods.**

**1. Grades.**

**2. Discussion and Dialogue.**

**3. Tests.**

**Evaluation:**

**Grades: Research, Reports,  
and Tests**

### **A. Knowledge and Understanding**

**1-1 Functions of the body's organs in a normal state of health.**

**1- 2 Functions of some body organs in diseased states.**

**1- 3 The importance of body fluids such as blood and lymph for human life.**

**1-4 Preparing trained and qualified laboratory personnel to work in medical laboratories**

### **B. Subject-Specific Skills**

**B-1 Students acquire general knowledge of human organ functions.**

**B-2 Know how to handle and use laboratory materials and equipment.**

**B-3 Acquire practical laboratory examination skills.**

### **Teaching and Learning Methods**

**Through theoretical and practical lectures and visual aids such as the blackboard and smart devices, and practical application of lectures in the laboratory by conducting laboratory examinations.**

### **C. Evaluation Methods**

**1 - Short daily exams**

**2 - Termly exams**

**3 - Preparing reports for each student or each group on academic topics**

### **D. Thinking Skills**

**D 1. Dialogue Method between Student and Professor.**

**D 2. Sample Preparation Skill.**

**D 3. Conducting Discussions and Interpreting Results.**

**D 4. Enabling the Student to Diagnose Abnormal Cases  
After Examining Them.**

**e. General and Transferable Skills**

**e 1. The student is able to apply the knowledge he has received.**

**e 2. The student is able to master the skill of the teaching and profession learning.**

**e 3. The student is able to embody what he has acquired in professional development.**
